

Volkswagen and Audi Immobilizer program

Due to the end of support for Microsoft Windows XP, the VAS –PC immobilizer program has been discontinued and replaced by the VW and Audi ODIS System. If you currently use the The VAS – PC program, it will still operate but updates or software support are no longer available.

The introduction of the ODIS System offers several improvements to the VAS – PC immobilizer program.

Features include:

- Windows 7 Compatibility
- One software package for access to both brands
- One year subscriptions
- Complete diagnostic capability
- Full time Security systems access (with registration)
- On-line diagnostic software updates
- J2534 pass thru interface capable

Please refer to details under the “Vehicle Diagnostics” heading on the Erwin home page.

Thank You
